
TECHNICAL SKILLS

DATA STORES	Amazon Redshift, MongoDB, Elasticsearch, Redis, Cassandra, MySQL, PostgreSQL, Aerospike
LANGUAGES/LIB.	Python, Javascript, SQL, Node.JS, Express.JS, React JS, Angular JS, Shell Script, Java
TOOLS	DBT, Apache Kafka, Spark, Airflow, Docker, Kibana, Logstash, LLMs, LlamaHub, NGINX, Git
CLOUDS/SAAS	AWS, Microsoft Azure, Google Cloud, Digital Ocean, Linode, Heroku, Postman, Apollo.IO, JIRA

EXPERIENCE

Self-employed

Nov 2024 - Present

INDEPENDENT PRODUCT STRATEGIST & TECHNICAL LEADER

- **Launched 4 micro ventures** in domains such as digital products shop, blogging platform, Print on demand and physical book
- Applied engineering leadership principles on technical execution, releasing products with **SSO login, payments and referral programs**
- Iteratively researched market opportunities, validated business strategies, and explored monetization models with user feedback

Apollo.IO (Zenleads Inc.)

Aug 2023 - Oct 2024 (1+ Year)

A sales platform supporting enrichment, prospecting, engagement till closing deals; Lead 2 Data products teams in prospecting stage with 15+ members and 2 Product Managers, one focusing on 0-1 innovation and second focusing on scaling from 1-100.

SOFTWARE ENGINEERING MANAGER

- **Launched 4 major products**, two of them led by our team and other two in partnership with different product teams and AI/LLM assisted
- **Cut bounce rate by 50%+** for our customers by gathering signals from all users of the engagement platform and identifying bad emails
- Automated asks from sales and customer success teams which **reduced turn around time from 2 weeks to 5 minutes** for such requests

Hackerrank Inc.

May 2022 - July 2023 (1+ Year)

A developer skills assessment platform; Lead the Runtime team with 5 Product Managers that handled various development environments and collaborated with other teams to optimize performance, cost, on-call, quality, and release processes.

SENIOR ENGINEERING MANAGER

- Enhanced customer delight culture by introducing a systematic process that helped Customer success team achieve **20x faster SLOs**
- Built a new platform for launching environments and automating manual processes reducing to **3-4 days delivery from almost a year**
- **Accelerated release cycles by 6x** by introducing Hubs, Spokes & Pods model to handle visionary and missionary goals in parent team
- Led the effort to migrate infrastructure to new efficient system resulting in around **75% cost savings** and increased reliability

Postman Inc.

July 2018 - April 2022 (3.75+ Years)

An API Development and testing platform; Managed a fully remote Data engineering team that delivered fast and reliable analytics solutions for various product and business goals and experiments.

ENGINEERING MANAGER

July 2020 - April 2022 (1.75+ Years)

- Built & grew to **10+ remote members from team of 5** in-office people by remotely hiring and smoothening out onboarding and contribution
- Designed and launched platform to scale data ingestion **by 1000x to 10 billion rows/month** and handle **100x more data in TBs** of storage
- Led the project to design and implement systems for data sourcing from data warehouse that enabled Universal Search and Enterprise Reporting features for **17 Million users of Postman API Platform** [\[Link\]](#)

TECHNICAL LEAD

June 2019 - June 2020 (1 Year)

- Directly impacted **10+ teams** and contributed to data driven culture by launching Data transformation platform and pushing for Data democratisation along with Data Analysis team [\[Link\]](#)
- Introduced ELT philosophy after migrating from ETL which **cut data processing time by 4x** while bringing principle of Software engineering in data analytics using Data Build Tool (DBT)

SOFTWARE ENGINEER (DATA ENGINEERING)

July 2018 - June 2019 (1 Year)

- **Slashed storage cost by 2x** in Amazon Redshift by implementing compression strategies in tables and **also increased queries speed by 6x**

MineWhat Inc.

May 2015 - June 2018 (3+ Years)

E-commerce Analytics and Intelligence platform; Handled backend of products and started real-time recommendations.

SENIOR SOFTWARE ENGINEER

Jan 2017 - June 2018 (1.5+ Years)

- Saved **7x storage cost** of MongoDB by implementing interoperable compression [\[Link\]](#)
- Reduced Elasticsearch **index size by 60x & cut indexing time by 98%** by remodeling document keys & sparse attributes efficiently [\[Link\]](#)

SOFTWARE ENGINEER

May 2015 - Jan 2017 (1.5+ Years)

- Built and maintained stream-based analytics system, which handled traffic of **10s of millions of user events per day**
- Managed distributed Systems and NoSQL databases while ensuring high availability and resiliency

EDUCATION & AWARDS

Dec 2022 - Present	Certified Mentor , 15+ sessions with 10+ mentees (Engineering Managers, Product Managers, Software Engineers) from multiple countries
Apr 2015	B. Tech. in Computer Science & Engineering, CGPA: 9.0/10.0 , Guru Ghasidas University
June 2014	Training in Network Management, 4th out of 115 students , IIT-KGP + Nettech Pvt. Ltd.
